

Random Decamers

Description: Thermo Scientific random decamers are ideal for priming reverse transcription assays. They can be used to create a pool of cDNAs for subsequent applications, thus providing maximum flexibility.

Ordering Information: AB-1265/B Random Decamers (400ng/μl) 100μl

Storage: Store at -20°C until ready for use for up to 1 year. Shipped on ice within the UK and on dry ice for international and within the US.

For Research Purposes Only
