

Thermo Scientific equipment maintains precise temperature control for critical aerospace and defense applications. These rugged, easy-to-maintain units offer a high degree of reliability.

## Recirculating Chillers & Heat Exchangers for Aerospace & Defense Applications

### Typical applications:

- Cluster electronics cooling
- Environmental testing
- Radar/sonar system cooling
- CCD cameras
- Weapon systems
- Security & detection systems
- Specialty vehicles
- Microwave & laser cooling
- Portable power systems
- Research & development

### Rely on Us for Product Breadth and Applications Knowledge

Thermo Fisher Scientific offers a range of temperature control options for aerospace and defense applications. We can help you with specialty applications, including PAO fluids. Whether you need equipment for research, production or field applications, we have the expertise and knowledge to help.

### Keep Your Application Up and Running

Our recirculating chillers and heat exchangers are intuitive to operate and easy to maintain. Thermo Scientific NESLAB ThermoFlex units even allow you to keep your application up and running during routine maintenance.

### High Reliability to Maximize Uptime

Thermo Scientific recirculating chillers and heat exchangers feature robust, modular design and construction. Our equipment is designed for trouble-free operation to maximize uptime.

### Proven Temperature Control Expertise

Thousands of Thermo Scientific NESLAB chillers and heat exchangers are installed and supported around the world. Our decades of technical and applications experience have enabled us to gain global leadership in the industry.

**Worldwide Support Capabilities**

Our proven temperature control technology is backed by worldwide service and support capabilities. Our ability to support customers globally with a range of support options is just one reason why we are a preferred supplier to the armed forces and defense contractors.

Service Feature	Warranty	Performance EXTEND	Performance PLUS	Performance ESSENTIAL	Performance ADVANTAGE
<b>Description</b>	Manufacturer warranty at the time of purchase	Add one additional year of basic contract services before the manufacturer warranty expires	Provide enhanced contract services during original warranty period and extended warranty period	Post warranty-purchase of an annual contract for PM and calibration services	Post warranty-purchase one year of enhanced contract services
